TOXICOLOGY

SUBJECT INDEX

Volume 71 (1992)

2-acetylaminofluorene, calcium, hepatocytes, quin-2, cell viability, 21
2-aminofluorene, aromatic amines, bioactivation, mutagenesis, Ames test, 7
alkyl hydroperoxide, glutathione peroxidase, cellular glutathione, 119
Ames test, 2-aminofluorene, aromatic amines, bioactivation, mutagenesis, 7
anti-convulsant, calcium valproate, valproic acid, sodium valproate, uterine adenocarcinomas, rats, 35
aromatic amines, 2-aminofluorene, bioactivation, mutagenesis, Ames test, 7
aryl hydrocarbon hydroxylase, human placenta, placental calcifications, 257

benomyl, microsomal enzymes, metabolism, hepatotoxicity, 63
benzo(*a*)pyrene, 7*H*-dibenzo(*c*,*g*)-carbazole, dibenz(*a*,*j*)acridine, tumor initiation, mouse skin, 233
bioactivation, 2-aminofluorene, aromatic amines, mutagenesis, Ames test, 7

Ca^{2+}-ATPase, endoplasmic reticulum, liver tumour promoters, 1
cadmium, cytotoxicity, endothelial cells, endothelium, proliferation, 267
cadmium, distribution, kidney, viral infection, 193
cadmium, transforming growth factor beta, epidermal growth factor, tritium thymidine incorporation, TGFβ neutralizing antibody, 161
calcium, 2-acetylaminofluorene, hepatocytes, quin-2, cell viability, 21
calcium valproate, valproic acid, sodium valproate, anti-convulsant, uterine adenocarcinomas, rats, 35
cellular glutathione, glutathione peroxidase, alkyl hydroperoxide, 119
cell viability, 2-acetylaminofluorene, calcium, hepatocytes, quin-2, 21
cephaloridine, nephrotoxicity, diuresis, streptozotocin, 245
chick embryo, valproate, neural tube defects, in vitro, 137
Clara cell, cytochrome *P*-450, ozone, rat lung, scanning electron microscopy, 223
compensatory renal growth, unilateral nephrectomy, renal metallothionein, renal mercury accumulation, 103
compensatory renal growth, unilateral nephrectomy, renal metallothionein metabolism, mercury, 83
convulsions, cyanide, cyclic GMP, N^G-nitro-L-arginine, guanylate cyclase inhibitor, 277
coumarin, gerbil, hepatotoxicity, rat, 129
cyanide, convulsions, cyclic GMP, N^G-nitro-L-arginine, guanylate cyclase inhibitor, 227
cyclic GMP, cyanide, convulsions, N^G-nitro-L-arginine, guanylate cyclase inhibitor, 227
cytochrome *P*-450, Clara cell, ozone, rat lung, scanning electron microscopy, 223
cytochrome *P*-450, oocyte destruction, ovary, ovarian cell, 7,12-dimethylbenz[*a*]anthracene, polycyclic aromatic hydrocarbon, 203
cytosolic long-chain acyl-CoA hydrolase, peroxisome proliferator, liver, rat, 151
cytotoxicity, cadmium, endothelial cells, endothelium, proliferation, 267

dibenz(*a*,*j*)acridine, 7*H*-dibenzo(*c*,*g*)-carbazole, benzo(*a*)pyrene, tumor initiation, mouse skin, 233
7,12-dimethylbenz[*a*]anthracene, oocyte destruction, ovary, ovarian cell, cytochrome *P*-450, polycyclic aromatic hydrocarbon, 203
1,3-diphenylguanidine, male fertility, sperm abnormalities, reproductive toxicity, mice, 173
distribution, cadmium, kidney, viral infection, 193
diuresis, cephaloridine, nephrotoxicity, streptozotocin, 245

endoplasmic reticulum, Ca^{2+}-ATPase, liver tumour promoters, 1
endothelial cells, cadmium, cytotoxicity, endothelium, proliferation, 267
endothelium, cadmium, cytotoxicity, endothelial cells, proliferation, 267

epidermal growth factor, cadmium, transforming growth factor beta, tritium thymidine incorporation, TGFβ neutralizing antibody, 161

gerbil, coumarin, hepatotoxicity, rat, 129
glucagon, nickel toxicity, hyperglycaemia, insulin, glycogen, 181
glutathione peroxidase, cellular glutathione, alkyl hydroperoxide, 119
glycogen, nickel toxicity, hyperglycaemia, glucagon, insulin, 181
guanylate cyclase inhibitor, cyanide, convulsions, cyclic GMP, N^G-nitro-L-arginine, 277
hepatocytes, 2-acetylaminofluorene, calcium, quin-2, cell viability, 21

hepatotoxicity, benomyl, microsomal enzymes, metabolism, 63
hepatotoxicity, coumarin, gerbil, rat, 129
hepatotoxicity, peroxisome proliferators, mitochondrial respiration, 49
hexane, ventricular fibrillation threshold, Langendorff, perfusion apparatus, magnesium, potassium, zinc, 145
7*H*-dibenzo(*c*,*g*)-carbazole, dibenz(*a*,*j*)acridine, benzo(*a*)pyrene, tumor initiation, mouse skin, 233
human placenta, aryl hydrocarbon hydroxylase, placental calcifications, 257
hyperglycaemia, nickel toxicity, glucagon, insulin, glycogen, 181

insulin, nickel toxicity, hyperglycaemia, glucagon, glycogen, 181
in vitro, valproate, neural tube defects, chick embryo, 137

kidney, cadmium, distribution, viral infection, 193

Langendorff, hexane, ventricular fibrillation threshold, perfusion apparatus, magnesium, potassium, zinc, 145
liver, cytosolic long-chain acyl-CoA hydrolase, peroxisome proliferator, rat, 151
liver tumour promoters, endoplasmic reticulum, Ca^{2+}-ATPase, 1
luteinizing hormone, methanol, testosterone, stress, 69

magnesium, hexane, ventricular fibrillation threshold, Langendorff, perfusion apparatus, potassium, zinc, 145
male fertility, 1,3-diphenylguanidine, sperm abnormalities, reproductive toxicity, mice, 173
mercury, unilateral nephrectomy, compensatory renal growth, renal metallothionein metabolism, 83
metabolism, benomyl, microsomal enzymes, hepatotoxicity, 63
methanol, luteinizing hormone, testosterone, stress, 69
mice, 1,3-diphenylguanidine, male fertility, sperm abnormalities, reproductive toxicity, 173
microsomal enzymes, benomyl, metabolism, hepatotoxicity, 63
mitochondrial respiration, peroxisome proliferators, hepatotoxicity, 49
mouse skin, 7*H*-dibenzo(*c*,*g*)-carbazole, dibenz(*a*,*j*)acridine, benzo(*a*)pyrene, tumor initiation, 233
mutagenesis, 2-aminofluorene, aromatic amines, bioactivation, Ames test, 7

nephrotoxicity, cephaloridine, diuresis, streptozotocin, 245
neural tube defects, valproate, chick embryo, in vitro, 137
N^G-nitro-L-arginine, cyanide, convulsions, cyclic GMP, guanylate cyclase inhibitor, 277
nickel toxicity, hyperglycaemia, glucagon, insulin, glycogen, 181

oocyte destruction, ovary, ovarian cell, 7,12-dimethylbenz[*a*]anthracene, cytochrome *P*-450, polycyclic aromatic hydrocarbon, 203
ovarian cell, oocyte destruction, ovary, 7,12-dimethylbenz[*a*]anthracene, cytochrome *P*-450, polycyclic aromatic hydrocarbon, 203
ovary, oocyte destruction, ovarian cell, 7,12-dimethylbenz[*a*]anthracene, cytochrome *P*-450, polycyclic aromatic hydrocarbon, 203
ozone, Clara cell, cytochrome *P*-450, rat lung, scanning electron microscopy, 223

perfusion apparatus, hexane, ventricular fibrillation threshold, Langendorff, magnesium, potassium, zinc, 145
peroxisome proliferator, cytosolic long-chain acyl-CoA hydrolase, liver, rat, 151
peroxisome proliferators, hepatotoxicity, mitochondrial respiration, 49
placental calcifications, aryl hydrocarbon hydroxylase, human placenta, 257
polycyclic aromatic hydrocarbon, oocyte destruction, ovary, ovarian cell, 7,12-dimethylbenz[*a*]anthracene, cytochrome *P*-450, 203
potassium, hexane, ventricular fibrillation threshold, Langendorff, perfusion apparatus, magnesium, zinc, 145

proliferation, cadmium, cytotoxicity, endothelial cells, endothelium, 267
quin-2, 2-acetylaminofluorene, calcium, hepatocytes, cell viability, 21

rat, coumarin, gerbil, hepatotoxicity, 129
rat, cytosolic long-chain acyl-CoA hydrolase, peroxisome proliferator, liver, 151
rats, calcium valproate, valproic acid, sodium valproate, anti-convulsant, uterine adenocarcinomas, 35
rat lung, Clara cell, cytochrome *P*-450, ozone, scanning electron microscopy, 223
renal mercury accumulation, unilateral nephrectomy, compensatory renal growth, renal metallothionein, 103
renal metallothionein, unilateral nephrectomy, compensatory renal growth, renal mercury accumulation, 103
renal metallothionein metabolism, unilateral nephrectomy, compensatory renal growth, mercury, 83
reproductive toxicity, 1,3-diphenylguanidine, male fertility, sperm abnormalities, mice, 173

scanning electron microscopy, Clara cell, cytochrome *P*-450, ozone, rat lung, 223
sodium valproate, calcium valproate, valproic acid, anti-convulsant, uterine adenocarcinomas, rats, 35
sperm abnormalities, 1,3-diphenylguanidine, male fertility, reproductive toxicity, mice, 173
streptozotocin, cephaloridine, nephrotoxicity, diuresis, 245
stress, methanol, luteinizing hormone, testosterone, 69

testosterone, methanol, luteinizing hormone, stress, 69

TGFβ neutralizing antibody, cadmium, transforming growth factor beta, epidermal growth factor, tritium thymidine incorporation, 161
transforming growth factor beta, cadmium, epidermal growth factor, tritium thymidine incorporation, TGFβ neutralizing antibody, 161
tritium thymidine incorporation, cadmium, transforming growth factor beta, epidermal growth factor, TGFβ neutralizing antibody, 161
tumor initiation, 7*H*-dibenzo(*c*,*g*)-carbazole, dibenz(*a*,*j*)acridine, benzo(*a*)pyrene, mouse skin, 233

unilateral nephrectomy, compensatory renal growth, renal metallothionein, renal mercury accumulation, 103
unilateral nephrectomy, compensatory renal growth, renal metallothionein metabolism, mercury, 83
uterine adenocarcinomas, calcium valproate, valproic acid, sodium valproate, anti-convulsant, rats, 35

valproate, neural tube defects, chick embryo, in vitro, 137
valproic acid, calcium valproate, sodium valproate, anti-convulsant, uterine adenocarcinomas, rats, 35
ventricular fibrillation threshold, hexane, Langendorff, perfusion apparatus, magnesium, potassium, zinc, 145
viral infection, cadmium, distribution, kidney, 193

zinc, hexane, ventricular fibrillation threshold, Langendorff, perfusion apparatus, magnesium, potassium, 145
